27 February 1984

STAT

Enclosed are two draft papers which are being circulated and discussed by members of an IHC subcommittee working group. They are strawman papers which address video disc standards. Decisions on various issues and procedures will be made within the next few weeks and be used within an RFP which is currently being prepared by DMA to produce video disc maps. I would appreciate receiving any comments you would care to make on them at your earliest possible convenience. If you would care to telephone your comments, call Mr. :
